***Drawings***

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 19. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "two air outlets" for claim 3 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure

is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

Claim 13 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim 13 cannot depend another multiple dependent claim 12. See MPEP § 608.01(n). Accordingly, the claim\*\*\* not been further treated on the merits.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Regarding claims 8-13, the phrase "or the like", "for instance" in claim 8 renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), "for instance), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3 4, 5, 6, 7 and 8 rejected under 35 U.S.C. 102(b) as being anticipated by Jenkins (5,501,269). Jenkins discloses an air conditioning housing 22 comprising an interior space and an heat exchanger with coils 26, 28 located within the interior space, the housing being provided with an air inlet opening 78 and a pair of outlet openings 82 communicating an exterior of the housing 22 with the interior space, wherein the housing is at least partially formed from plastics material using a rotomoulding (see column 2, lines 30-32) technique; a water sump 64 . See Fig.1, 2, 5 and 6, column 3, line 25 to column 7, line 10.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 and 8 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Zima et al., (6,045,444). Zima et al., disclose an air conditioning housing 30 comprising an interior space and an heat exchanger /evaporator 56 located within the interior space, the housing being provided

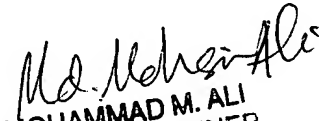

Art Unit: 3744

with an air inlet opening upstream of the evaporator 56 and a pair of outlet openings 54 and 46 communicating an exterior of the housing 30 with the interior space, wherein the housing is at least partially formed from plastics material using a moulding (see column 4, lines 17-25) technique; a water sump/pan (inherent/lowest part of the housing under the evaporator 56). See Fig.11, column 1, line 8-27, column 4, line 17 to column8, line 8. Zima et al., disclose the invention substantially as claimed as stated above including rotomoulding technique. Examiner considers the moulding technique adapted by Zima et al could be a rotomoulding technique; Alternatively adapting a roto moulding technique is an obvious choice of the individual skilled in the art since there is no criticality or unexpected result from it.
